Gentlemen :

To harness the new capitol project, Grant Tower, we want to move forward with the expedited train moves and reduced congestion around the Salt Lake terminal complex. The start up of Ogden to Milford pool with engineer's being pick as pilots will begin on Nov. 2, 2007. Once the pilots are trained, the pool should start operation around Nov. 15. Bulletins for pool turns will be put up for bidding according to Hub agreements. We are figuring around 7 to 10 pool turns. The following are the train symbols for the pool at this time, subject to change. Please let me know if you have any questions or feedback.
